

Irina Bilinskaia

Robotics & AI Student

Klagenfurt, Austria · +43 678 792 0733 · kirkaera@gmail.com

drkirka.github.io/masait · github.com/drkirka

Robotics & AI student at AAU Klagenfurt with hands-on experience developing robot control systems, computer vision applications, and AI software. Experience with C++ systems programming, Python development, and hardware-software integration. Interested in autonomous systems, intelligent control, and applied AI.

TECHNICAL SKILLS

Languages: Python, C, C++, JavaScript, HTML/CSS

AI / ML: PyTorch, scikit-learn, NumPy, Hugging Face Transformers

Computer Vision: OpenCV

Backend / Tools: Flask, REST APIs, Git, Linux, Docker, Jupyter

Robotics: Arduino, Niryo Robots, sensor integration

PROJECTS

[Robot Vision Web Service](#) | Lab Project | AAU Klagenfurt | [2026](#)

Python-based control system for a Niryo robot performing conveyor object sorting. Developed multithreaded robot control logic, integrated IR sensors and OpenCV-based object detection, and built Flask web controls for monitoring and configuration. Implemented speech-command interaction and configurable sorting workflows.

Stack: Python, Flask, OpenCV, pyniryo, threading

[LLM Language Learning Assistant](#) | Team Project | [2026](#)

Developed a local NLP assistant using Mistral 3B for Japanese–English translation and language learning workflows. Applied prompt engineering and implemented basic LoRA fine-tuning on multilingual datasets.

Stack: Python, PyTorch, Hugging Face Transformers

[Gym application](#) | Team Project | [2026](#)

Client-server fitness application in C++ with PostgreSQL persistence using ODB ORM and an interactive FTXUI terminal interface. Configured containerized deployment using Docker Compose.

Stack: C++, CMake, ODB, PostgreSQL, FTXUI, Docker

[Matchmaking Telegram Bot](#) | Personal Project | [2025](#)

Telegram bot in Python implementing questionnaire-based user matching with conversational state management and automated profile pairing.

[Interactive Vision Web App](#) | Personal Project | [2026](#)

Browser-based computer vision application using OpenCV for real-time face, smile, and gesture detection with live webcam processing.

Stack: HTML/CSS/JavaScript, OpenCV

EDUCATION

BSc Artificial Intelligence & Robotics | Alpen-Adria-Universität Klagenfurt, Austria | [2025 – present](#)

Relevant Coursework: Advanced Programming in C/C++, Algorithms & Data Structures, Operating Systems & Computer Networks, Control Engineering, Introduction to Robotics, Introduction to Artificial Intelligence I & II, Design of Digital Circuits, Circuit Engineering, Physics for Engineers: Electricity and Magnetism, Symbolic AI & Logic

BSc Design | Belarusian State University, Minsk | [2023 – 2024](#)

Completed one year before transferring to Artificial Intelligence & Robotics; background in visual thinking and UX.

WORK EXPERIENCE

Sales & Customer Service | IKEA, Klagenfurt | [2024 – present](#)

Guest Services Agent | Hilton Hotel, Minsk | [2021 – 2023](#)

Accounting Assistant | Medical Clinic, Minsk | [2022 – 2023](#)

ADDITIONAL INFORMATION

Languages: Russian & Belarusian (native), English (C1), German (B2), Spanish (A2)

Interests: Autonomous systems, human-robot interaction, open-source robotics
